

BALLOON EXPERIMENT

The Greenhouse Effect: Earth's Blanket

STEP 1:

Blow up a balloon and tie it. Say, "This is our atmosphere!"

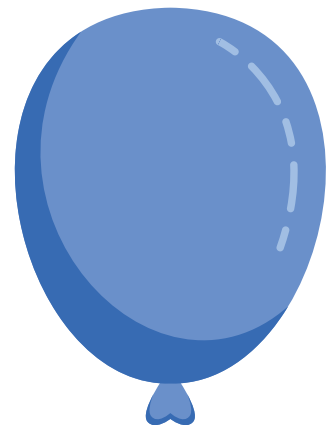

STEP 2:

Put the balloon in the fridge for 10-15 minutes. What happens? (It shrinks!)

STEP 3:

Take it out and let it warm up. Watch it get bigger again

Cool, right? The heat-trapping gases in the air work a bit like this balloon.
